

**ALBERTA PRECISION  
LABORATORIES**

Leaders in Laboratory Medicine

## Note to File

**Date: January 25, 2021**

**RE: Edmonton Zone Clinical Trial & Research Delegation Log Signage**

---

This Note to File applies to the signing of Delegation Logs by Edmonton Zone Clinical Trial & Research (CT&R) Technologist II Staff.

The Edmonton Zone Clinical Trials Technologist II Staff sign delegation logs on behalf of all Alberta Precision Laboratory (APL) Laboratory departments. These Technologists have the following up-to date training and collaborate closely with all APL departments to facilitate Clinical Trials & Research:

- Transportation of Dangerous Goods - Ground and Air
- Good Clinical Practice Course
- Health Canada Division 5 – Drugs for Clinical Trials Involving Human Subjects

One of CT&R Technologist IIs will sign the Delegation Log on behalf of laboratory staff that collect, process, package and ship Clinical Trial samples. The Technologists have shared and interchangeable responsibility for all trials. Staff that perform the collection, processing, packaging and processing of samples are TDG trained. Clinical Trial protocols, laboratory manuals, internal requisitions and standard operating procedures provide resources for these tasks.
