CC: Dr. Lawrence Richer, Vice Dean Research FoMD / Centre Director NACTRC
Marc Leduc, Senior Provincial Director - HEI
Mishaela Houle, Executive Director, Cardiac Sciences

From: Simon Wong – Director of Operations, NACTRC

RE: Welcome – Lee Ann Langkaas, Clinical Trial Unit

We are pleased to announce that Lee Ann Langkaas has commenced as the AHS CTU Manager effective February 6th, 2023. Lee Ann has over 20 years clinical research experience within a broad scope of positions including the University of Alberta Hospital and industry. Her areas of expertise include clinical trial management, project management, contract and budget negotiations, financial administration and budgeting, staff training, policy, protocol and SOP development, quality assurance and regulatory compliance, study participation recruitment and leadership.

Lee Ann will be based at College Plaza and will collaborate with the CTU at CCI, the Clinical Investigation Unit and the FoMD Office of Research at UofA. Meetings of introduction will be scheduled with each interested Investigator to initiate the process of staff recruitment to the newly established CTU and discuss your program resourcing requirements.

The new CTU will provide direct support to Principal Investigators conducting interventional clinical trials and engage with AHS unit managers and clinicians to better enable the conduct of trials in their areas.

Please join me in welcoming Lee Ann.

Simon Wong
