Re: Update of Province Wide Laboratory Services and Test List for Clinical Trials and Research Studies

Alberta Precision Laboratories (APL) provides a single price list for tests and services for Clinical Trials and research studies. These prices are reviewed and revised annually. This memo serves as advanced notice that the Province Wide Laboratory Services and Test List for Clinical Trials and Research Studies has been updated.

This update will come into effect across the province on April 1, 2024.

As before, if you have access to Insite the updated list of laboratory services and tests will be available at [Update of Province Wide Laboratory Services and Test List for Clinical Trials and Research Studies \(albertahealthservices.ca\)](https://albertahealthservices.ca)

For fiscal year April 1, 2024 to March 31, 2025:

- Tests and services have been adjusted for inflation.
- The list is not exhaustive, but reflective of common tests and services utilized for research purposes.

All Clinical Trial and Research Studies will be invoiced at the new prices effective Apr 1, 2024. Clinical Trials and Research operates on a cost recovery basis as per AHS/APL policies.
